I am not sure what you mean regarding your instructions to “make a copy of the document to be redacted” and put an “r” in front of it. The only 2 documents that need redaction are 40027074 and 40031773.  
Also there were no documents in the non-pdf files (first 4 on the list of docs).

You will need Adobe Pro and if you don’t have it we have it on the computers in the Lit room. You make a copy of the document you want redacted –just add an R in front of it. When you are done all the ones with R’s we will give a new barcode number. If it doesn’t need to be redacted drag it into the UR folder. If it needs to be redacted drag the original into the folder with original in the title and the copy you redacted goes in the RR folder. If there are any you want to withhold all of then they go in the UU folder. I’ll be in the office tomorrow and Monday if you need any assistance.

Melissa: Do you have some specific instructions on how to redact information in the Rose Chemicals FOIA?

In modern times we use all electronic (no media) where possible. He did not tell me he wanted a disc and it is easier for him to look at the docs on the web at FOIAonline.

We should probably just load the 10 documents into FOIA online, and then give him access to those if that is possible. Ten

documents may be large to email.

If the docs are okayed for release, you can send them to the requestor – they will also need to be uploaded into FOIAonline by Melissa as that's the official record. We can put the request on hold until the requestor lets us know what else he wants.

Melissa,

Let Scott and I know the best most efficient way to have Scott review and then we release these documents as the first part of FOIA 7118. It is 10 documents and he may request additional later.

Emily,

Is it ok to release these 10 and then just wait to hear from requestor, or is there another process for stepwise FOIAs ?

If you send me a list of the documents you are interested in, we can assemble those and have an attorney review for releasability. Since the documents are electronic, we can then upload them into FOIAonline where you can read and download.

Dear Jamie,

Thank you for this exhaustive list of files.

How do I go about getting some of the files on the list electronically?

Thanks, Michael
